Work Date and Hours Log

Date	Hours	Description of work completed
October 9, 2026	1.0	I studied the basic tools in Figma. I learned about frames, layers, text, and shapes.
October 10, 2026	1.5	I watched beginner Figma tutorials. I studied components, Auto Layout, spacing, and alignment.
October 11, 2026	1.0	I searched for a simple UI and UX work process. I wrote notes about research, sketches, wireframes, prototypes, and testing.
October 12, 2026	1.5	I studied requirement analysis for a social app. I wrote questions about user needs, privacy, safety, and usability.
October 13, 2026	1.0	I searched for ideas about the main purpose of SeenYouAround. I focused on helping people remember someone they saw before.
October 15, 2026	1.0	I studied possible key features. I compared an encounter list, a map, connection requests, and messages.
October 16, 2026	1.5	I sketched simple screen ideas on paper. I explored where the main buttons and information could go.
October 17, 2026	1.0	I searched for color ideas. I studied blue, teal, and warm accent colors for a safe and friendly feeling.
October 18, 2026	1.5	I reviewed my Progress Report.
Total	**11.0**	

Description of Work Completed

During this period, I studied Figma and basic UI and UX design. I watched tutorials and took notes. I learned about frames, layers, components, Auto Layout, spacing, and alignment.

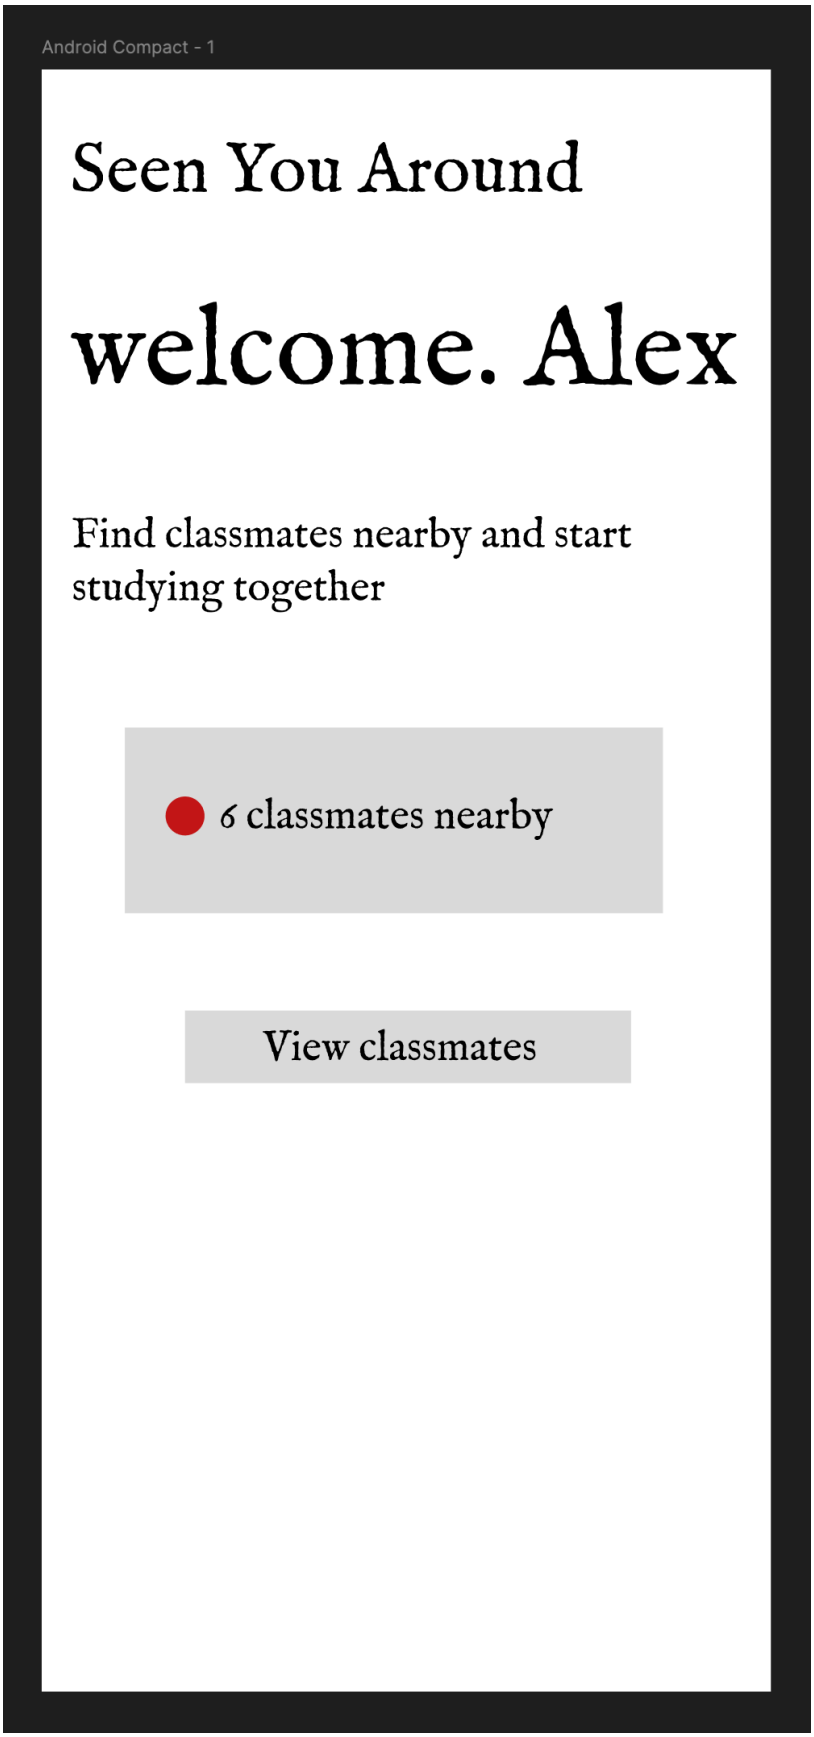

I also searched for a simple work process. I studied requirement analysis, user flows, wireframes, prototypes, testing, and revision. This helped me understand the order of the design work.

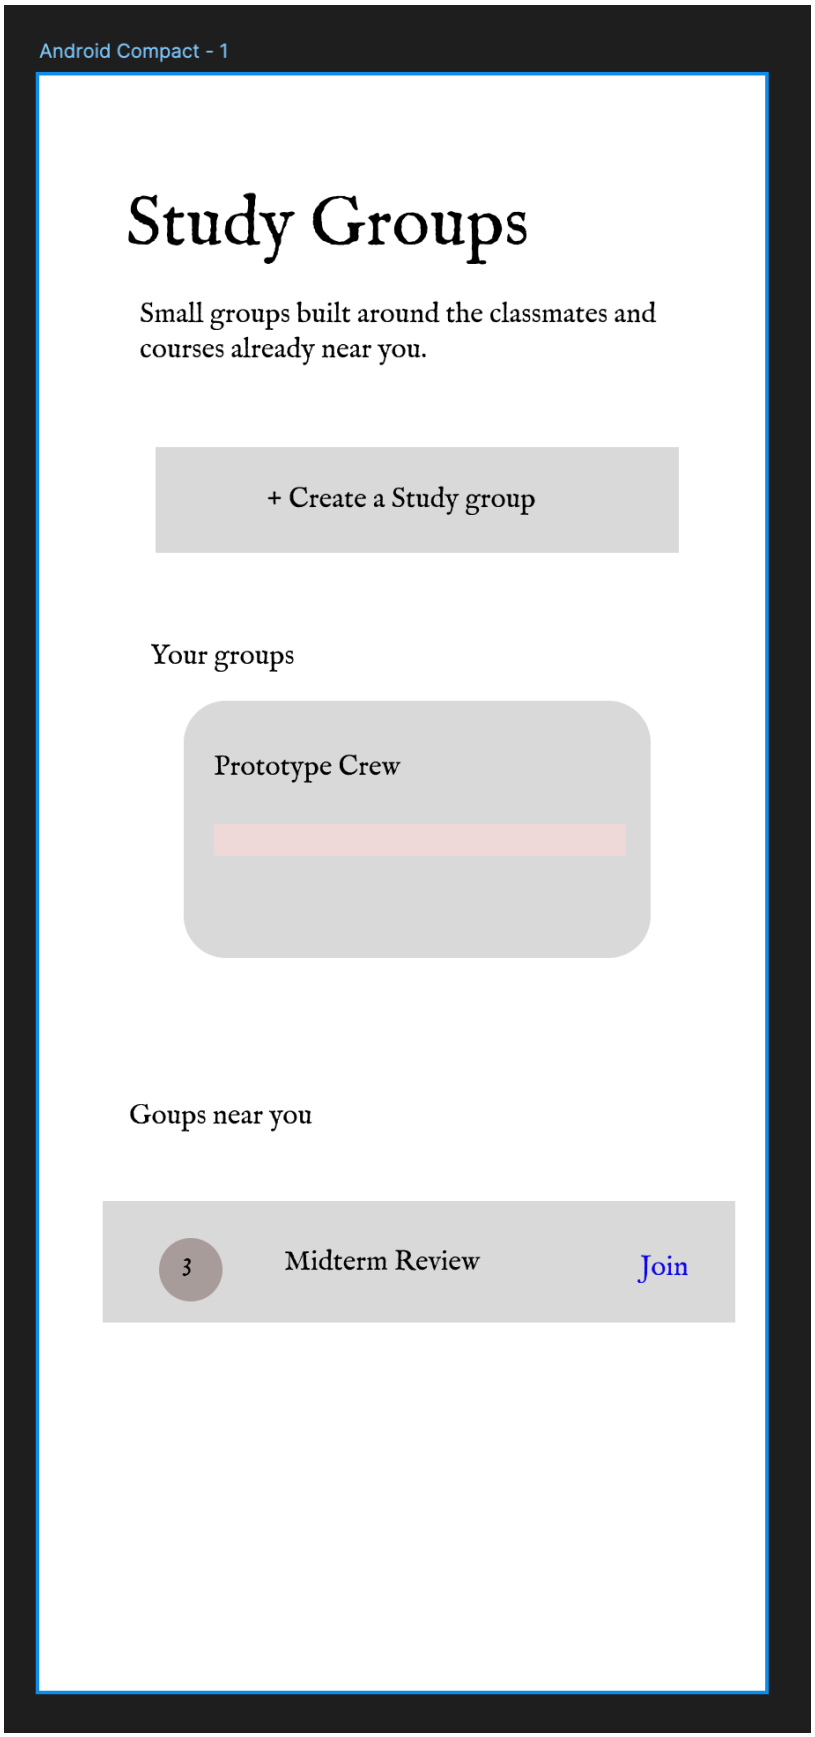

I researched the purpose of SeenYouAround. I also searched for possible screens and key features. The app may need onboarding, login, a home screen, encounter details, connection requests, messages, a profile, privacy controls, and settings.

I studied privacy and safety because the app is based on seeing people nearby. The app should not show an exact live location. Users should have control over connections, messages, blocking, and reporting.

I searched for color ideas and made simple paper sketches. I have not created the final screens or design. My work at this stage is research, study, notes, and early sketches. My next step is to make simple wireframes in Figma.

I practiced creating wireframes for the Welcome and Study Group screens in Figma and became more familiar with grouping objects and text elements.

AI Use Section

Table of AI Tools and Specific Use

AI tool name	Version and account type	Specific feature for which the AI tool was used
ChatGPT	Latest available version - Plus account	organize information, help with searches, prepare documentation

Value Addition

I checked the information and chose what was useful for my project.

I decided which topics to study and which ideas to sketch.

The screen ideas and sketches are based on my own research and decisions.

Appendix Prompt History

Prompt 1

What basic Figma tools should I study before making mobile app wireframes?

Prompt 2

Find beginner Figma tutorial topics.

Prompt 3

Organize a simple UI and UX work process for a student mobile app project.

Prompt 4

What should I study when doing requirement analysis for a social app?

Prompt 5

Organize research questions about the purpose and users of SeenYouAround.

Prompt 6

What screens should I research for the first version of a mobile social app?

Prompt 7

Organize possible key features for SeenYouAround so I can compare them.

Prompt 8

What should I study before sketching a simple mobile app user flow?
